DEV TRIVEDI

trivedidev16@gmail.com | linkedin.com/in/trivedi-dev | +1 551-396-7091 | New Jersey

EDUCATION:

New Jersey Institute of Technology, Ying Wu College of Computing, New Jersey *January 2025 – December 2026*
Master of Science in Computer Science (GPA: 4.0)
Relevant Coursework: Operating Systems, Database Management System, Web Development, Machine Learning, Big Data

Jawaharlal Nehru Technological University, Malla Reddy Engineering College, India *November 2020 - July 2024*
Bachelor of Technology in Computer Science and Engineering

WORK EXPERIENCE:

Software Developement Engineer : RR Enterprise *July 2024 - December 2024*

- Engineered robust C++ AWS S3 ingestion pipeline processing 10000 records daily into MongoDB, reducing manual effort
- Built dynamic React + Express dashboard on AWS Amplify providing managers insights into the project timelines and budgets
- Designed secure, scalable Node.js REST APIs on AWS EC2 with Swagger + JWT, boosting the cross-team data access by 75%
- Implemented comprehensive structured logging and automated health checks using CloudWatch, enabling service monitoring

Software Developement Engineer : Nuance Media *September 2023 - May 2024*

- Delivered optimized React applications on Vercel with code-splitting, notably improving overall client campaign performance
- Optimized complex MongoDB schemas with compound indexes, reducing the latency from 400ms to 180ms for faster insights
- Shipped 20+ critical features in Agile sprints using Jira, Github and Jest, ensuring testing, consistent high-quality deliverables
- Automated efficient build and deployment workflows with GitHub Actions for CI/CD, cutting release cycle time by 40%

PROJECTS:

Ride Share: (MERN Stack) *June 2025 – August 2025*

- Built ride-sharing MVP using MongoDB, Express, React, Node.js with JWT authentication and secure role-based workflows
- Implemented geohash nearest-neighbor matching and OSRM routing with Socket.IO, delivering real-time updates instantly
- Deployed containerized services with Docker on Vercel achieving 90.4% uptime and sub-second ride matching latency

Cyber Threat Predictor: (Python, Django, Machine Learning) *May 2025 - July 2025*

- Processed 2.1M IIoT network packets, reducing false positives by 34% using optimized preprocessing and feature engineering
- Trained ensemble of SVM, Random Forest achieving 94.1% detection accuracy with 0.1s inference latency per sample
- Deployed federated learning pipeline improving cross-site AUC by 0.21 while maintaining privacy of sensitive edge data

ChatterBox: (C++, Systems Programming) *Feb 2025 – May 2025*

- Designed terminal-based multi-user chat with System V IPC, RAII wrappers, and thread synchronization supporting 50+ users
- Implemented mutex-protected server–client concurrency enabling message exchange with 0.4s average response latency
- Built lightweight binary protocol with timestamps ensuring ordered delivery, reducing dropped messages by 93% in stress tests

SKILLS:

- **Programming Languages:** C++, Python, Java, JavaScript, TypeScript, SQL
- **Tech Stack and Database:** Node.js, Express.js, React.js, REST APIs, HTML5, CSS3, JSON, MongoDB, PostgreSQL, Redis
- **Cloud Platforms:** AWS (EC2, S3, RDS, DynamoDB, Lambda, CloudWatch, API Gateway, Elastic Beanstalk), Azure (Virtual Machines, Blob Storage, SQL Database, Functions, Monitor, API Management, App Service)
- **DevOps & Testing:** Docker, Kubernetes, GitHub Actions, Jenkins, Nginx, Gitlab, Git, GitHub, Postman, Swagger, Jest, Jira

LEADERSHIP EXPERIENCE:

- **Team Lead, Qualcomm AI Hackathon, NYU, New York City** *Sept 2025*
  Led a 4-member team to build an edge-based computer vision prototype with Qualcomm AI Stack
- **Event Coordinator, NJIT GDG, Newark** *April 2025*
  Organized coding workshop and peer-learning sessions for 40+ students, fostering collaboration in emerging technologies
